

TCRC Mapping of all People Served by SC [Link to Map](#)

1. Go to the link in any web browser, you will see our **entire caseload mapped**
2. To filter the list by SC, Click on **Show Options**
3. Change the first condition (“Last”) to **SCID** using the pull down option
4. Leave the “=” and add the **SCID in all CAPS** (excluding the TC) in the next field box
5. Click Apply
6. Pan and Zoom to locate the data (Hint: You can click and drag the map to Pan)
7. Clicking on any marker will display contact information

The screenshot displays the Google Fusion Tables interface for a dataset named 'Dec 2010 all.csv'. The map shows a distribution of red markers across California. The filter section is active, showing a condition: SCID = NES. A callout box for a selected marker displays the following information: Last, First, Address, UCH#, PHONE, and SCID. The interface also includes options for 'Pan' and 'Zoom' on the map, and a 'Show Options' button to access the filter settings.

- Evacuation warnings can be compared to this data and affected people can be identified quickly
- SCs can filter their caseloads to find specific people quickly
- Contact information is at your fingertips
